

$^{227}\text{Th}^{19}\text{F}^+$ · deformed-nucleus theory estimate
 $X^3\Delta_1$ · levels correlated with $J = 1-3$ · basis $J \leq 8$

Exploratory model; uncertainty not shown. Zero-field J labels; J mixes in E. Stark: stepwise character tracking; Zeeman: energy order within (mF, p).
Molecular constants transferred unscaled from $^{232}\text{ThF}^+$; unknown Th spin rotation omitted; no physical uncertainty band.
