

227Th19F+ · deformed-nucleus theory estimate · $E_z = 100$ V/cm $B_z = 0$ G
 $X^3\Delta_1$ · one panel per (J, F_1) manifold · basis $J \leq 8$

Each panel is referenced to its own (J, F_1) zero-field centroid, printed as its offset;
 differences of those offsets give the spacing between any two manifolds.
 Panels in a row share one energy window, set by the widest manifold in that row.
